## SURVEY GIVES OUT FIGURES ON MINES OF STATE

Estimates of Geographical Society Borne Out in Official Document Just Issued From Washington.

Albuquerque, Dec. 27.—The United States geological survey has just issued a report on the mineral resources of the state of New Mexico, which is the first of its kind since 1899.

The survey shows that the state of New Mexico is rich in mineral resources, and that the geological survey has been able to locate many new mines. The report also gives a detailed description of the various types of minerals found in the state, and the methods used to extract them.

The survey also shows that the state of New Mexico is rich in coal resources, and that the geological survey has been able to locate many new coal fields. The report also gives a detailed description of the various types of coal found in the state, and the methods used to extract them.
